## FOREWORD

PT. Rollent Indonesia was established as PT. Daeyang Rollent Indonesia in 2006 and located in Gresik, East Java, Indonesia.

Building the era of conveyor rollers, stands, pulleys and related components using localized production in Indonesia. We are making efforts in the constant research and the improvement of quality, willing to be the leading company in the conveyor roller business as the PT. Rollent Indonesia in the world, doing all our duty and responsibilities as a company specializing in active conveyors.

As a result of these efforts, various types of rollers that can be used according to the facility features have been developed, some of them already have the patents approved and many others are in the process, and their capacities such as smooth rolling, strong solidness and their unique sailing devices are showing their real values.

PT. Rollent Indonesia will do its best for the production of competitive products with excellent quality. We highly appreciate the customers who have been liberal in the interest and support until the day of today PT. Rollent Indonesia , and we ask the customers much interest in and consideration of us PT. Rollent Indonesia company, who are making efforts in the development of new products which opens the future of distribution business.

Our vision :

**Perfect**
